Deepesh Kumar Jain

AI Automation Engineer | SAP Joule Studio Agent Building | Microsoft Power Platform | n8n | AI Agents | ERP Process Automation
Greater Hyderabad Area

Summary

n8n Creator profile: https://n8n.io/creators/deepeshitis/I build AI agents and workflow automation for real business processes. My main focus is SAP Joule Studio, along with n8n and the Microsoft Power Platform.What I work with:- SAP Joule Studio: building agents, and mapping SAP's 63 ready-to-use Joule agents by area and access status.- n8n: seven working agents on my self-hosted setup (AI sales assistant, lead qualification, opportunity monitoring with proposal support, proposal generator, customer support, research, knowledge-base chatbot).- Microsoft Power Platform: hands-on Power Automate, AI Builder and Copilot Studio.- Also: GenAI, APIs, business-system integrations, with human review and traceability built in.Two examples:1. Opportunity monitoring agent: scrapes platforms for new projects, pulls out requirements, scores them, helps draft the proposal. Apify, n8n, GPT, Sheets/Airtable, Telegram/WhatsApp alerts.2. Joule Studio agent catalog: a sheet of 63 SAP ready-to-use agents, marked GA, beta or early-access.My background is ERP and business analysis: requirements, BRDs and SRS, process mapping, finance, HRMS and procurement systems. That's why my agents start from the process and business rules, not the tool.Open to AI automation projects and AI Automation Engineer roles.

Experience

Tayana Solutions

AI Automation Engineer
June 2026 - Present (5 months)
Atlanta, Georgia, United States

I design and build AI automations that take repetitive business work off people's plates.

What I work on:

- Workflow automation with n8n: trigger, AI agent, data store and auto-reply flows
- AI agents with SAP Joule Studio for ERP and business-process use cases
- Process automation and apps with Microsoft Power Platform
- Hands-on AI and automation training for learners and professionals

My earlier years as a Functional Consultant in SAP/ERP help me design automations around how work actually gets done, not just how it looks on paper.

Hidden Brains InfoTech

3 years 6 months

Functional Business Analyst

October 2023 - June 2026 (2 years 9 months)

Ahmedabad, Gujarat, India

As a Business Analyst at Hidden Brains, I contributed to ERP implementations and compliance-driven initiatives by aligning business requirements with technology solutions.

Key contributions:
- Collaborated with clients and stakeholders to gather requirements, analyze workflows, and identify system gaps
- Prepared BRD, SRS, and RFP documentation to support solution design and delivery
- Built structured knowledge bases for ERP modules including HRMS, Recruitment, Performance Management, Contract Management, Procurement, and Finance
- Supported compliance projects across Morocco (Accounting Plan PCM), Papua New Guinea (Tax System), and Kenya (Trade Workflows)
- Designed process flows, system diagrams, and functional documentation for complex business scenarios
- Acted as a liaison between business and technical teams to ensure clarity, sign-offs, and delivery alignment
- Assisted pre-sales and proposal teams with solution inputs, assumptions, and risk considerations
- Supported QA validation and UAT readiness to ensure alignment with business and compliance requirements

This role strengthened my expertise in ERP implementation, regulatory compliance, functional documentation, and stakeholder-led delivery across enterprise projects.

Business Analyst
January 2023 - September 2023 (9 months)
Ahmedabad, Gujarat, India

Test Yantra
Quality Analyst
July 2022 - December 2022 (6 months)
Bengaluru, Karnataka, India

Google Cloud Facilitator Program
Google cloud ready facilator
April 2021 - July 2021 (4 months)
Remote

Learned many things like kubernities engines, virtual machine etc
